Volume Contents

Volume 19 Number 1

C. H. Morales	1	On the range of sums of accretive and continuous operators in Banach spaces
J. López-Gómez and R. Pardo San Gil	11	Coexistence regions in Lotka–Volterra models with diffusion
D. Andreucci and E. DiBenedetto	29	Weak solutions of the type of nonstationary filtration
J. V. A. Gonçalves and O. H. Miyagaki	43	Multiple nontrivial solutions of semilinear strongly resonant elliptic equations
M. Oberguggenberger	53	Case study of a nonlinear, nonconservative, nonstrictly hyperbolic system
Yin Huicheng and Qiu Qingjiu	81	Tangent interaction of co-normal waves for second order full nonlinear strictly hyperbolic equations
Software Survey Section	I	

Volume 19 Number 2

Y. Cao, Jiangping Fan and T. C. Gard	95	The effects of state-dependent time delay on a stage-structured population growth model
S. Jiang	107	Global solutions of the Neumann problem in one-dimensional nonlinear thermoelasticity
N. Hirano	123	Existence of multiple solutions for quasilinear and semilinear elliptic equations
H.-P. Heinz and C. A. Stuart	145	Solvability of nonlinear equations in spectral gaps of the linearization
G. M. Webb and G. P. Zank	167	On the Painlevé analysis of the two-dimensional Burgers' equation
V. L. Vereschagin	177	Whitham equations for one-phase solutions of Volterra lattice

R. MEDINA and M. PINTO 187 Asymptotic behavior of solutions of second order nonlinear difference equations

SOFTWARE SURVEY SECTION I

Volume 19 Number 3

R. SMARZEWSKI 197 A characterization of fixed point property

J. L. C. CAMARGO 201 Some results on fixed points in a Cartesian product

J.-F. RODRIGUES and B. ZALTZMAN 207 On classical solutions of the two-phase steady-state Stefan problem in strips

YAN SHUSEN and ZHANG ZHENGJIE 219 A minimization problem on R^N involving critical Sobolev exponent

F. R. MAROTTO 229 Period doubling and quadrupling for some second-order difference schemes

M. GIRARDI and M. MATZEU 237 Essential critical points of linking type and solutions of minimal period to superquadratic Hamiltonian systems

M. S. BERGER and Y. Y. CHEN 249 Forced quasiperiodic and almost periodic oscillations of nonlinear duffing equations

A. DE PABLO and J. L. VAZQUEZ 259 An overdetermined initial and boundary-value problem for a reaction–diffusion equation

G. BEER 271 The slice topology: a viable alternative to Mosco convergence in nonreflexive spaces

SOFTWARE SURVEY SECTION I

Volume 19 Number 4

C. CHIU, Q. DU and T. Y. LI 291 Error estimates of the Markov finite approximation of the Frobenius–Perron operator

YIN JINGXUE 309 Solutions with compact support for nonlinear diffusion equations

A. TINEO 323 Existence theorems for a singular two-point Dirichlet problem

A. TINEO 335 Existence of global coexistence state for periodic competition diffusion systems

HE ZHEN 345 Some mapping theorems involving the perturbations of m-accretive operators

J. GÓRNICKI and M. KRÜPPEL 353 Fixed point theorems for mappings with Lipschitzian iterates

M. BERTSCH, J. R. ESTEBAN and ZHANG HONGFEI 365 On the asymptotic behaviour of the solutions of a degenerate equation in hydrology

U. KRAUSE and P. RANFT 375 A limit set trichotomy for monotone nonlinear dynamical systems

M. FEČKAN 393 Melnikov functions for singularly perturbed ordinary differential equations

SOFTWARE SURVEY SECTION I

Volume 19 Number 5

MING-PO CHEN and JANPOU NEE 403 An existence theorem for some high order elliptic equations

P. L. FELMER 409 Rotation type solutions for spatially periodic Hamiltonian systems

S. L. HOLLIS and J. J. MORGAN 427 Partly dissipative reaction–diffusion systems and a model of phosphorus diffusion in silicon

W. E. HORNOR 441 Liapunov–Razumikhin pairs and the location of positive limit sets for precompact functional differential equations with infinite delay

C.-M. BRAUNER, A. LUNARDI and CL. SCHMIDT-LAINÉ 455 Stability of travelling waves with interface conditions

Z.-M. CHEN 475 A specifically fully nonlinear perturbation of the heat equations in exterior domains

M. CUESTA and J.-P. GOSSEZ 487 A variational approach to nonresonance with respect to the Fučik spectrum

SOFTWARE SURVEY SECTION I

Volume 19 Number 6

W. T. VAN HORSSEN 501 Asymptotics for a class of semilinear hyperbolic equations with an application to a problem with a quadratic nonlinearity

A. MASIELLO 531 Time-like periodic trajectories in stationary Lorentz manifolds

W. ZHANG 547 Sensor noise effect in rate feedback via saturating actuators: distributed parameter system

YAO JINGQI 563 Time decay of solutions to a nonlinear Schrödinger equation in an exterior domain in $\mathbb{R}^2$

L. BOCCARDO and T. GALLOUET 573 Strongly nonlinear elliptic equations having natural growth terms and L^1 data

L. BOCCARDO and F. MURAT 581 Almost everywhere convergence of the gradients of solutions to elliptic and parabolic equations

SOFTWARE SURVEY SECTION I

Volume 19 Number 7

A. JOFRE and L. THIBAULT 599 Proximal and Fréchet normal formulae for some small normal cones in Hilbert space

NGUYEN THANH LONG and A. PHAM NGOC DINH 613 On the quasilinear wave equation: $u_{tt} - \Delta u + f(u, u_t) = 0$ associated with a mixed nonhomogeneous condition

F. DEMENGEL and R. HADIJI 625 Relaxed energies for functionals on $W^{1,1}(B^2, S^1)$

A. RODRÍGUEZ-BERNAL 643 Initial value problem and asymptotic low dimensional behavior in the Kuramoto–Velarde equation

A. RODRÍGUEZ-BERNAL 687 On the construction of inertial manifolds under symmetry constraints—I. Abstract results

SOFTWARE SURVEY SECTION I

Volume 19 Number 8

J. A. ESQUIVEL-AVILA 701 Liapunov stability properties in second order evolution equations with finite memory

P. HRILJAC 717 Analytic dynamics in some pseudoconvex domains

R. ORTEGA 731 Critical growth for a superlinear elliptic problem in two dimensions

B. DJAFARI ROUHANI 741 Asymptotic behaviour of unbounded trajectories for some nonautonomous systems in a Hilbert space

O. V. KAPTSOV 753 Invariant sets of evolution equations

M. BEN-ARTZI 763 Global existence and decay for a nonlinear parabolic equation

P. J. Y. WONG and R. P. AGARWAL 769 A new representation for the error function for the Hermite interpolation and sharper pointwise and uniform error bounds for the derivatives

M. VILLARINI 787 Regularity properties of the period function near a center of a planar vector field

SOFTWARE SURVEY SECTION I

Volume 19 Number 9

K.-K. TAN and H.-K. XU 805 An ergodic theorem for nonlinear semigroups of Lipschitzian mappings in Banach spaces

A. S. BRATUS' and A. D. MYSHKIS 815 Extremum problems for Laplacian eigenvalues with free boundary

LI TA-TSIEN and ZHOU YI	833	Life-span of classical solutions to fully nonlinear wave equations—II
Y. KUANG and H. L. SMITH	855	Slowly oscillating periodic solutions of autonomous state-dependent delay equations
L. MAZZI and M. SABATINI	873	Global integrals for plane systems with finitely many singularities
W. E. FITZGIBBON, J. MORGAN and R. SANDERS	885	Global existence and boundedness for a class of inhomogeneous semilinear parabolic systems
SOFTWARE SURVEY SECTION	I	

Volume 19 Number 10

CHIN-KU CHU, MYUNG-SUN KIM and KEON-HEE LEE	901	Lipschitz stability and Lyapunov stability in dynamical systems
W. L. CHAN, M. Q. XIAO and Y. ZHAO	911	Feedback stabilization of a class of multivalued nonlinear distributed parameter systems
G. ZAMPIERI	923	Diffeomorphisms with Banach space domains
HI JUN CHOE	933	Interior behaviour of minimizers for certain functionals with nonstandard growth
W. E. FITZGIBBON and C. B. MARTIN	947	The longtime behavior of solutions to a quasilinear combustion model
Z. LU and Y. TAKEUCHI	963	Permanence and global stability for cooperative Lotka–Volterra diffusion systems
M. E. VERONA and A. VERONA	977	Characterizations of maximal monotone operators
J. M. DYE and S. REICH	983	Unrestricted iterations of nonexpansive mappings in Banach spaces
H.-J. RUPPEN	993	Inherited bifurcation
G. X. FANG and J. WARGA	1001	A topological index condition for conical controllability
SOFTWARE SURVEY SECTION	I	

Volume 19 Number 11

T. ARBOGAST	1009	The existence of weak solutions to single porosity and simple dual-porosity models of two-phase incompressible flow
S. A. VAKULENKO	1033	The oscillating wave fronts
G. X. FANG and J. WARGA	1047	Functions with unstable images—I. Cracks of codimension 1
M. A. KHAMSI	1063	Uniform smoothness implies super-normal structure property
B. D. REDDY	1071	Mixed variational inequalities arising in elastoplasticity
D. TATARU	1091	Boundary value problems for first order Hamilton–Jacobi equations
SOFTWARE SURVEY SECTION	I	

Volume 19 Number 12

H. ZHANG	1111	On a nonlinear singular diffusion problem: convergence to a traveling wave
P. BILER	1121	Existence and asymptotics of solutions for a parabolic–elliptic system with nonlinear no-flux boundary conditions
X. C. FU and K. H. XU	1137	The Conley index and bifurcation points
E. YANAGIDA	1143	Uniqueness of positive radial solutions of $\Delta u + f(u, \|x\|) = 0$
KIN MING HUI	1155	Nonnegative solutions of the fast diffusion equation with strong reaction term
G. X. FANG and J. WARGA	1179	Functions with unstable images—II. Cracks of positive co-dimensions
